PROFESSIONAL SUMMARY

Frontend Developer with 6+ years of experience building and maintaining web applications, including customer-facing interfaces, dashboards, and content management systems. Specializes in Vue.js, Nuxt.js, React, and Next.js, with experience developing reusable components, integrating REST APIs, and writing unit tests. Independently handles frontend implementation across client and company projects while collaborating with design, backend, product, and QA teams.

WORK EXPERIENCE

Frontend Developer | Member.id

August 2022 - Present

- Develop and maintain multiple web applications, including Solva, Solva Reservation, and custom client projects, using Vue.js, Nuxt.js, React, and Next.js.
- Build customer-facing and admin interfaces for loyalty rewards, customer relationship management (CRM), vouchers, and reporting across these applications.
- Independently translate business requirements and UI/UX designs into frontend features, collaborating with backend engineers, designers, product teams, and QA through implementation and release.
- Build reusable components and shared modules to simplify maintenance, and validate features in recent projects through unit tests with Vitest and Jest and manual checks before QA handoff.

Frontend Developer | PT. Gramedia Asri Media

January 2021 - July 2022

- Developed and maintained web applications, including Mitra Gramedia's partner marketplace and e-Perpus's digital library systems, using Vue.js, Nuxt.js, React, Next.js, and AngularJS across projects.
- Built content management interfaces for clients to manage digital libraries and internal dashboards supporting business operations; also contributed frontend features to Gramedia.com's book marketplace.
- Collaborated with UI/UX designers, backend engineers, and QA to translate business requirements into features and deliver application updates from implementation through deployment.

Frontend Developer (Part-time) | Superhand

January 2021 - June 2021

- Built responsive landing pages for Superhand and WasiatOnline using Vue.js and Nuxt.js, translating UI/UX designs into web interfaces.
- Integrated backend APIs to populate dynamic page sections and optimized existing pages to improve performance.

WORK EXPERIENCE - CONTINUED

Frontend Developer | Lintasmaya Multi Media

October 2020 - December 2020

- Built a responsive company landing page with WordPress and developed a product catalog using Vue.js and Nuxt.js.
- Worked with a backend developer to implement application functionality and supported project deployment.

Frontend Developer | Edutore by Gramedia

December 2019 - July 2020

- Developed frontend features for Edutore Try-Out, an online practice exam application used by schools, and designed and implemented CMS interfaces using Vue.js and Nuxt.js.
- Collaborated with UI/UX designers and backend engineers to deliver features, resolve bugs, and improve application stability and performance.

TECHNICAL SKILLS

Languages & Web Technologies: JavaScript, TypeScript, HTML, CSS

Frontend Frameworks & Libraries: Vue.js, Nuxt.js, React, Next.js, AngularJS

State & Data Management: Pinia, React Query

UI & Styling: Tailwind CSS, Element Plus, shadcn/ui, Vuetify, Bootstrap, TanStack Table

API Integration: REST APIs, Axios

Testing: Unit testing with Vitest and Jest, manual testing

Frontend Practices: Reusable components, responsive interfaces, performance optimization, form accessibility, keyboard navigation

Backend (Personal Projects): Working knowledge of Node.js, Express.js, and NestJS

CMS: WordPress

EDUCATION

Universitas Terbuka

Information Systems | 2023 - Present

Coursework in programming, databases, networking, and information systems.

ADDITIONAL TRAINING

Arkademy (now Pijar Camp) | Full Stack Development

October - November 2019

Intensive training in mobile application development using React Native and Express.js.
