SUMMARY

Frontend Developer with 6+ years of experience building and maintaining web applications and B2B platforms, including customer-facing interfaces and administrative systems. Specializes in Vue.js, Nuxt.js, React, and Next.js, with experience developing reusable components, integrating REST APIs, and writing unit tests. Independently handles frontend implementation across client and company projects while collaborating with design, backend, product, and QA teams.

WORKING EXPERIENCE

Frontend Developer | Member.id

August 2022 – Present

- Develop and maintain web applications and B2B platforms, including Solva, Solva Reservation, and custom client projects, using Vue.js, Nuxt.js, React, and Next.js.
- Build customer-facing and administrative interfaces for loyalty rewards, customer relationship management (CRM), vouchers, and reporting.
- Independently translate business requirements and UI/UX designs into frontend features, collaborating with backend engineers, designers, product teams, and QA through implementation and release.
- Build reusable components and shared modules to simplify maintenance and validate features in recent projects through unit tests with Vitest and Jest and manual checks before QA handoff.

Frontend Developer | PT. Gramedia Asri Media

January 2021 – July 2022

- Developed and maintained B2B platforms, including Mitra Gramedia and e-Perpus's digital library systems, using Vue.js, Nuxt.js, React, Next.js, and AngularJS across projects.
- Built content management interfaces for digital library clients and internal dashboards supporting business operations; contributed frontend features to Gramedia.com's book marketplace.
- Collaborated with UI/UX designers, backend engineers, and QA to translate business requirements into features and deliver application updates from implementation through deployment.

Frontend Developer | Superhand (Part-time)

January 2021 – June 2021

- Built responsive landing pages for Superhand and WasiatOnline using Vue.js and Nuxt.js, translating UI/UX designs into web interfaces.
- Integrated backend APIs for dynamic page content and optimized existing pages to improve performance.

Frontend Developer | Lintasmaya Multi Media

October 2020 – December 2020

- Built a responsive company landing page with WordPress and a product catalog using Vue.js and Nuxt.js, collaborating with a backend developer on functionality and deployment.

Frontend Developer | Edutore by Gramedia

December 2019 – July 2020

- Developed frontend features for Edutore Try-Out, an online practice exam application used by schools, and designed and implemented CMS interfaces using Vue.js and Nuxt.js.
- Collaborated with UI/UX designers and backend engineers to deliver features, resolve bugs, and improve application stability and performance

EDUCATION

Universitas Terbuka | Jakarta

August 2023 – Present

Information Systems

- Coursework in programming, databases, networking, and information systems.

Arkademy (Bootcamp) | Jakarta

October 2019 – November 2019

Full Stack Development

- Intensive training in mobile application development using React Native and Express.js.
